A. Personal Statement

I am a tenured research associate at the French National Health Institute (Inserm), where I lead a research group at the Institut de la Vision (IdV) dedicated to the study of neuroinflammatory mechanisms in central nervous system (CNS) pathologies. I have over 20 years of experience studying **immune processes in neurodegenerative diseases**, including autoimmune responses in multiple sclerosis (PhD, Sorbonne University, 2004), the role of immune cells in Alzheimer’s disease and frontotemporal dementia (as a postdoctoral researcher at the University of Paris Sud and research associate at the Institut du Cerveau et de la Moelle épinière (ICM)) as well as inflammatory pathways in ocular pathologies (as a research associate at the IdV). My research on neuroimmunology has been published in a number of prestigious peer-reviewed journals including Aging Cell, Brain, Immunity, JCI, Journal of Neuroinflammation, Molecular Psychiatry and Progress in Neurobiology.

B. Degrees and Diplomas, Positions, and Honors

Degrees and Diplomas

2015: **Habilitation à diriger des recherches** (HDR), Université Paris 6
2004: **PhD** in Neurosciences, Université Paris 6
2000: **Master** in Neurosciences, Université Paris 6

Positions and Employment

Since 2018: **Research Associate** (tenure) (Team F. Sennlaub), **Institut de la Vision (IdV)** UMRS_968 INSERM/ UMR7210 CNRS /Sorbonne Université, Paris.
2009-2018: **Research Associate** (tenure) (Team B. Fontaine), **Institut du Cerveau et de la Moelle épinière (ICM)** UMRS_1127 – INSERM/ UMR7225 CNRS /UPMC, Paris.
2004-2008: **Post-doctorat** in Neuroimmunology (Team J. Kanellopoulos), **Institut de Biochimie et Biophysique Moléculaire et Cellulaire (IBBMC)** UMR8619 CNRS/Univ Paris Sud, Orsay.
2000-2003: **Master/PhD** in Neurosciences, (Team D. Pham-Dinh), **Affections de la myéline et des canaux ioniques musculaires** UMR_546 INSERM/UPMC, Paris.

Other Experience and Professional Memberships

Since 2019: **Scientific manager** of the cellular and tissular phenotyping platform of the Institut de la Vision (Part-time condition)
Since 2025: Member of the scientific “Neurodegenerative diseases” committee of the Fondation de France
Since 2022: Member of the COST action PRESTO “P2X receptors as a therapeutic opportunity” (CA211130)
Since 2021: Member of the GDR Microglia
2018-2024: Member of the research council of the Institut de la Vision (IdV)
2013-2017: Member of the administrative board of the IHU-A-ICM, Paris Institute of Translational Neuroscience
2011-2017: Member of the research council of the Institut du Cerveau et de la Moelle épinière (ICM)
Since 2000: Member of the International Society of Neuroimmunology

Expertises:

Reviewer for Brain, Molecular Psychiatry, Aging Cell, Journal of Neuroinflammation, Frontiers...
Reviewer for several grant applications (FRC, France Alzheimer, ARSEP, ITMO, FWO...)
Evaluator of numerous PhD for Doctoral school.

Honors

2007: Fellowship of Ligue Française contre la Sclérose en Plaques (LFSEP)
2004-2006: Fellowship of Association de Recherche sur la Sclérose en Plaques (ARSEP)
2004: Fellowship of Fondation pour la Recherche Médicale (FRM)
2000-2003: Fellowship of French Research Ministry

C. Grants

- 2024-2025: **IHU Foresight**: Analysis of the Immune Microenvironment of the Uveal melanoma (PI)
2024-2028: **Agence National pour la Recherche (ANR)** : Targeting P2X7 in T-cell mediated Autoimmunity (PI)
2020-2024: **Union des Aveugles et Déficiants visuels (UNADEV)** : P2X7, a novel therapeutic target in Uveitis (PI)
2016: **Institut Carnot** : A new family of cyclophilin inhibitors in neuroprotections (PI)
2014-2018: **Banque Publique d'investissement (BpiFrance)** : Role of Mastocytes in Neurology (co-PI)
2013-2017: **Agence National pour la Recherche (ANR)** : Role of the purinergic receptor P2X7 in Alzheimer's disease (PI)
2010-2012: **Association France Alzheimer** : Role of the purinergic receptor P2X7 in Alzheimer's disease (PI)

D. Supervision

1 post-doc; 5 PhD (3 ongoing); 12 Master students

E. Patent

2024: Tailored Thrombospondin-1s, which lack the properdin-like type 1 and EGF-like type2 repeats but contain the CD47-binding C-terminal domain, as agents to inhibit pathogenic inflammation

F. Publications - <https://pubmed.ncbi.nlm.nih.gov/?term=delarasse>

44 publications (PubMed), h-index = 25, >2500 citations

<https://orcid.org/0000-0001-9739-4306>
